HRMS

1) Roles

- Super Admin
- Admin
- User

2) Designations

- HR
- TL
- Managers
- Employee
- Intern
- Peon

3) Who will manage whom?

- Super admin can add everyone and will be invisible to admis too.
- Admins can manage everyone except Super Admin as that user won't be seen anywhere ... not even in the logs.
- Operation Manager and HR will have equal permissions to manage everyone else.
- Moreover, Admins/Super Admin will manage the permission that who can see what all things so it will be flexible.

4) Departments

1. HR
2. Operations
3. Pricing
4. Listing
5. Purchase
6. Accounts
7. Sales
8. IT (but every one will be calculate in the It only like network administrator, Digital marketing)

More departments could be added by Super Admin, Admin, HR & operation manager and even delete existing dept.

5) There are 3 levels: -

i. Junior
ii. Senior
iii. Simple eg: - Ecommerce executive or account executive!

What all things our Aeliya portal must be able to do?

- HR will manage attendance by daily adding leaves and the calculate payroll where they can even import excel file whose format will be fixed and one can even export the file in the same format.
- Employees will apply for leaves and their managers will approve the leaves of employees falling under their supervision, HR's leave or Operation Manager's leave will be handled by Admin.
- At every year there will be a time where our holiday calendar is formed so every holiday is counted and then HR/Admin/Super Admin can add/remove the Holidays as per their wish.
- Everyone has 1.5 leaves per month that can get carry forward every month and at the end of financial year if the employee's leave is in the bucket, then he/she gets the pay for that many days. Other than full day/half day leaves there is a short leave and 3 instance leave in which the short leave is of 2 hours (employee can arrive 2 hour late, take a 2 hour break in lunch and can leave at 3:30 if not taken the 1 hour lunch or else can leave at 4:30 pm) and for instance it is 30 mins and can be taken either in morning or at the end of day).
- The office hours could be adjusted by HR / operation manager / Admin / Super Admin ...currently its 9:30 am to 6:30 pm where employees can be allowed to arrive at 9:40 am after that if they have instance then it gets deducted or else short leave ... deduct short leave even if the employee arrives after 10 am will get short leave deducted or else half day (this will only be implemented if imported from the excel sheet)
- Everyone can see who's absent today and who's birthday Is today ... how much time left and how much free time left because everyone gets 1 hour of time which they can consume in lunch or tea break or any other break so there will be a start/end break button in the home page itself.
- The portal side bar will have multiple tabs like homepage, leaves, breaks, complaints, we will add some other tabs in future and sign out in the bottom.
- There will be layoffs and so HR will add the reason and resolution.
- Then there will be HR managing salary and increment and all the old records will be noted down.

There will be many more things that will be added in future!
